

FRANCO'S A-FRAMES

THE HOUSE OF TRIANGLES

About

"If it has an A-frame shape, I can build it.
If it doesn't, I'll probably convince you it should"

~Franco

What I Build: Custom A-frame cabins

*Whether huge or tiny, each cabin is designed to fit your
preference*

*A farmhouse getaway, An air
bnb investment, a backyard
retreat or that one of a kind
hideaway you have always
imagined*

*At Franco's A-frames, we turn
imagination into structure. Together, let
us bring to life your Pinterest boards,
your napkin sketches and the ideas you
have been saving for 'someday'*

We build cabins that look like they belong on a post card

What exactly is an A-Frame?

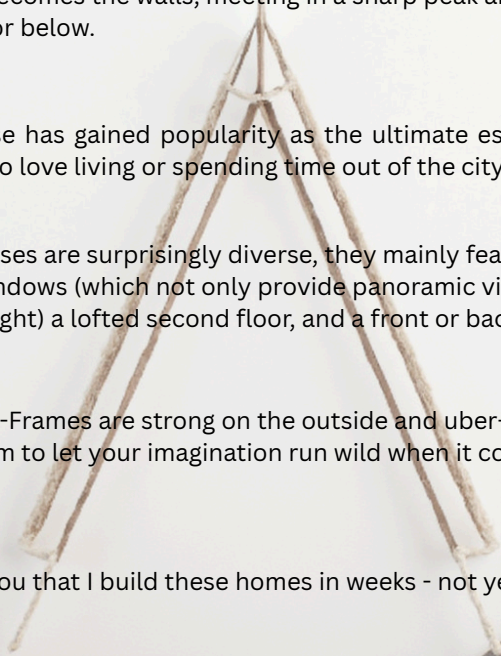

Structurally, an A-frame is a home shaped like a triangle. The sloping roof becomes the walls, meeting in a sharp peak and opening into a spacious main floor below.

The A-Frame house has gained popularity as the ultimate escape from the daily grind for those who love living or spending time out of the city.

While A-frame houses are surprisingly diverse, they mainly feature high ceilings, floor-to-ceiling windows (which not only provide panoramic views but let in plenty of natural light) a lofted second floor, and a front or back deck.

A timeless build, A-Frames are strong on the outside and uber-cozy on the inside, with plenty of room to let your imagination run wild when it comes to the interior design.

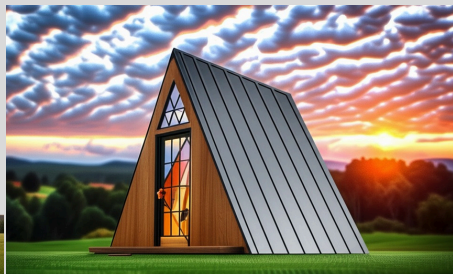

Did i tell you that I build these homes in weeks - not years?

Step by Step

1. The First Chat

We talk about your dream A-Frame — what you love, your location, budget, and timelines. I'll listen, ask questions and help you visualize what is possible so we start with a clear, exciting direction.

2. The Concept Sketch

I turn our notes into simple sketches and a concept board (massing, layout options and material ideas) This is where your Pinterest meets practical logic

3. The Plan & Quotation

You get a detailed plan, timeline, and cost breakdown. No surprises, just clarity.

4. Construction Begins

We build. You get regular progress updates and site walk throughs. Decisions are made together - With craftsmanship, quality controls and timelines front of mind.

5. Interior Touches

This is where the magic happens — lighting, flooring, finishes and cozy details. It's all customized to your taste.

6. Handover Day

When I hand you the keys, it's more than a finish line. It's the start of your ownership of a space built just for you. Built with integrity, delivered with pride and backed by my ongoing support

Why Choose Franco?

A passion built over time:

Construction has always been part of my story, watching my dad turn simple ground sketches into complete structures and complex site plans into magnificent architectural realities that stood tall and told stories of hard work and vision.

Somewhere in-between the noise of tools and the smell of timber i found something deeper, a love for creating spaces that move people and stand the test of time

Blending Craft with technology

With a background in IT, I bring a modern edge to building using digital visualization, smart home integrations and data driven project management to deliver efficiency, precision and design clarity from concept to completion

Experience you can trust

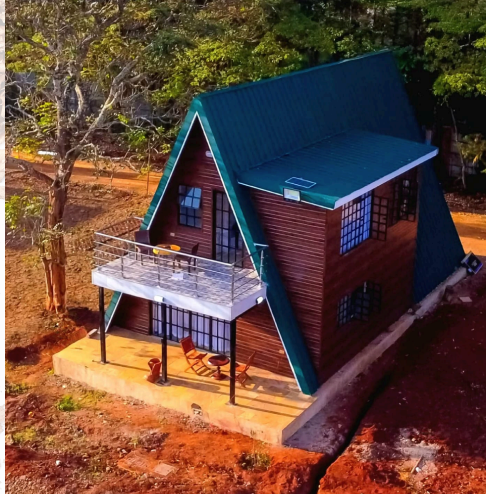

My portfolio spans from signature A-frame homes to largescale industrial and multi-storey projects each one built with a true commitment to quality

Why Choose Franco?

Every project gets my full attention

From first sketch to final nail, I am hands-on with every detail making sure your finished A-frame is exactly as you envisioned and built to last

Bro, wifey is obsessed.

She says everything looks just like the pics

You know she don give compliments easily. She was going to book a hotel but now she says she will be staying there for the 3days.

9:44 am

Be easy, I took my time with the finishes so she will definitely be comfortable. Kwanza it's mango season. And the grass is doing the thing cause it is raining. The furniture you shipped in fit like a glove. Now when you come home you have a place. Hope when she comes back she will give stories to the whole ATL crew. Air bnb's here have hit 30k a night. The rest of the Summer bunnies better be ready to be shafted

9:48 am ✓

No man. You really outdid yourself my guy.

I trusted you with cash, vision and mob details of wifey and you delivered.

She says it feels like home and now I'm homesick myself, cant wait for Dec.

Thanks deep down.

9:51 am

30 what? Ama I stay Christmas week I bnb week of new year 📅

Deep down I'm still a businessman 🤝

9:52 am

You guy! business does not like mchezo. My dad always use to say, 'build it like it's yours.' Like... Judy's work being done well brought you and jd. I want to deliver something you love and show off. I needed to show out with the workmanship cause I want anyone who sees yours to want one too.
